

FROST

WE MAKE **COOL** THINGS HAPPEN

ONBOARD SOLUTIONS

Frost is an **EXPERT** in processing vessels

	Solenoid Valve		Product Identification
	Hand Regulating Valve		Position Item number
	Check Valve / Stop-Check Valve		Orifice / Nozzle
	Filter		Fixed Pipe Connection
	Gas Powered Stop Valve		Cooling Coil number
	Pressure Transmitter		Over-Pressure Valve
	Pressure Regulating Valve		Pressure Regulating Valve with Solenoid
	Isolation, indicating diameter of insulation		Quick Closing Drain Valve
	Mechanical Float valve		Level Service
	Pressure Gauge		Motor actuated valve
	Single Safety Valve		Dual Safety Valve
	Circulation Pump		Differential Pressostat

OVER 25 NEW INSTALLATIONS

AND RETROFITS IN THE LAST 5 YEARS

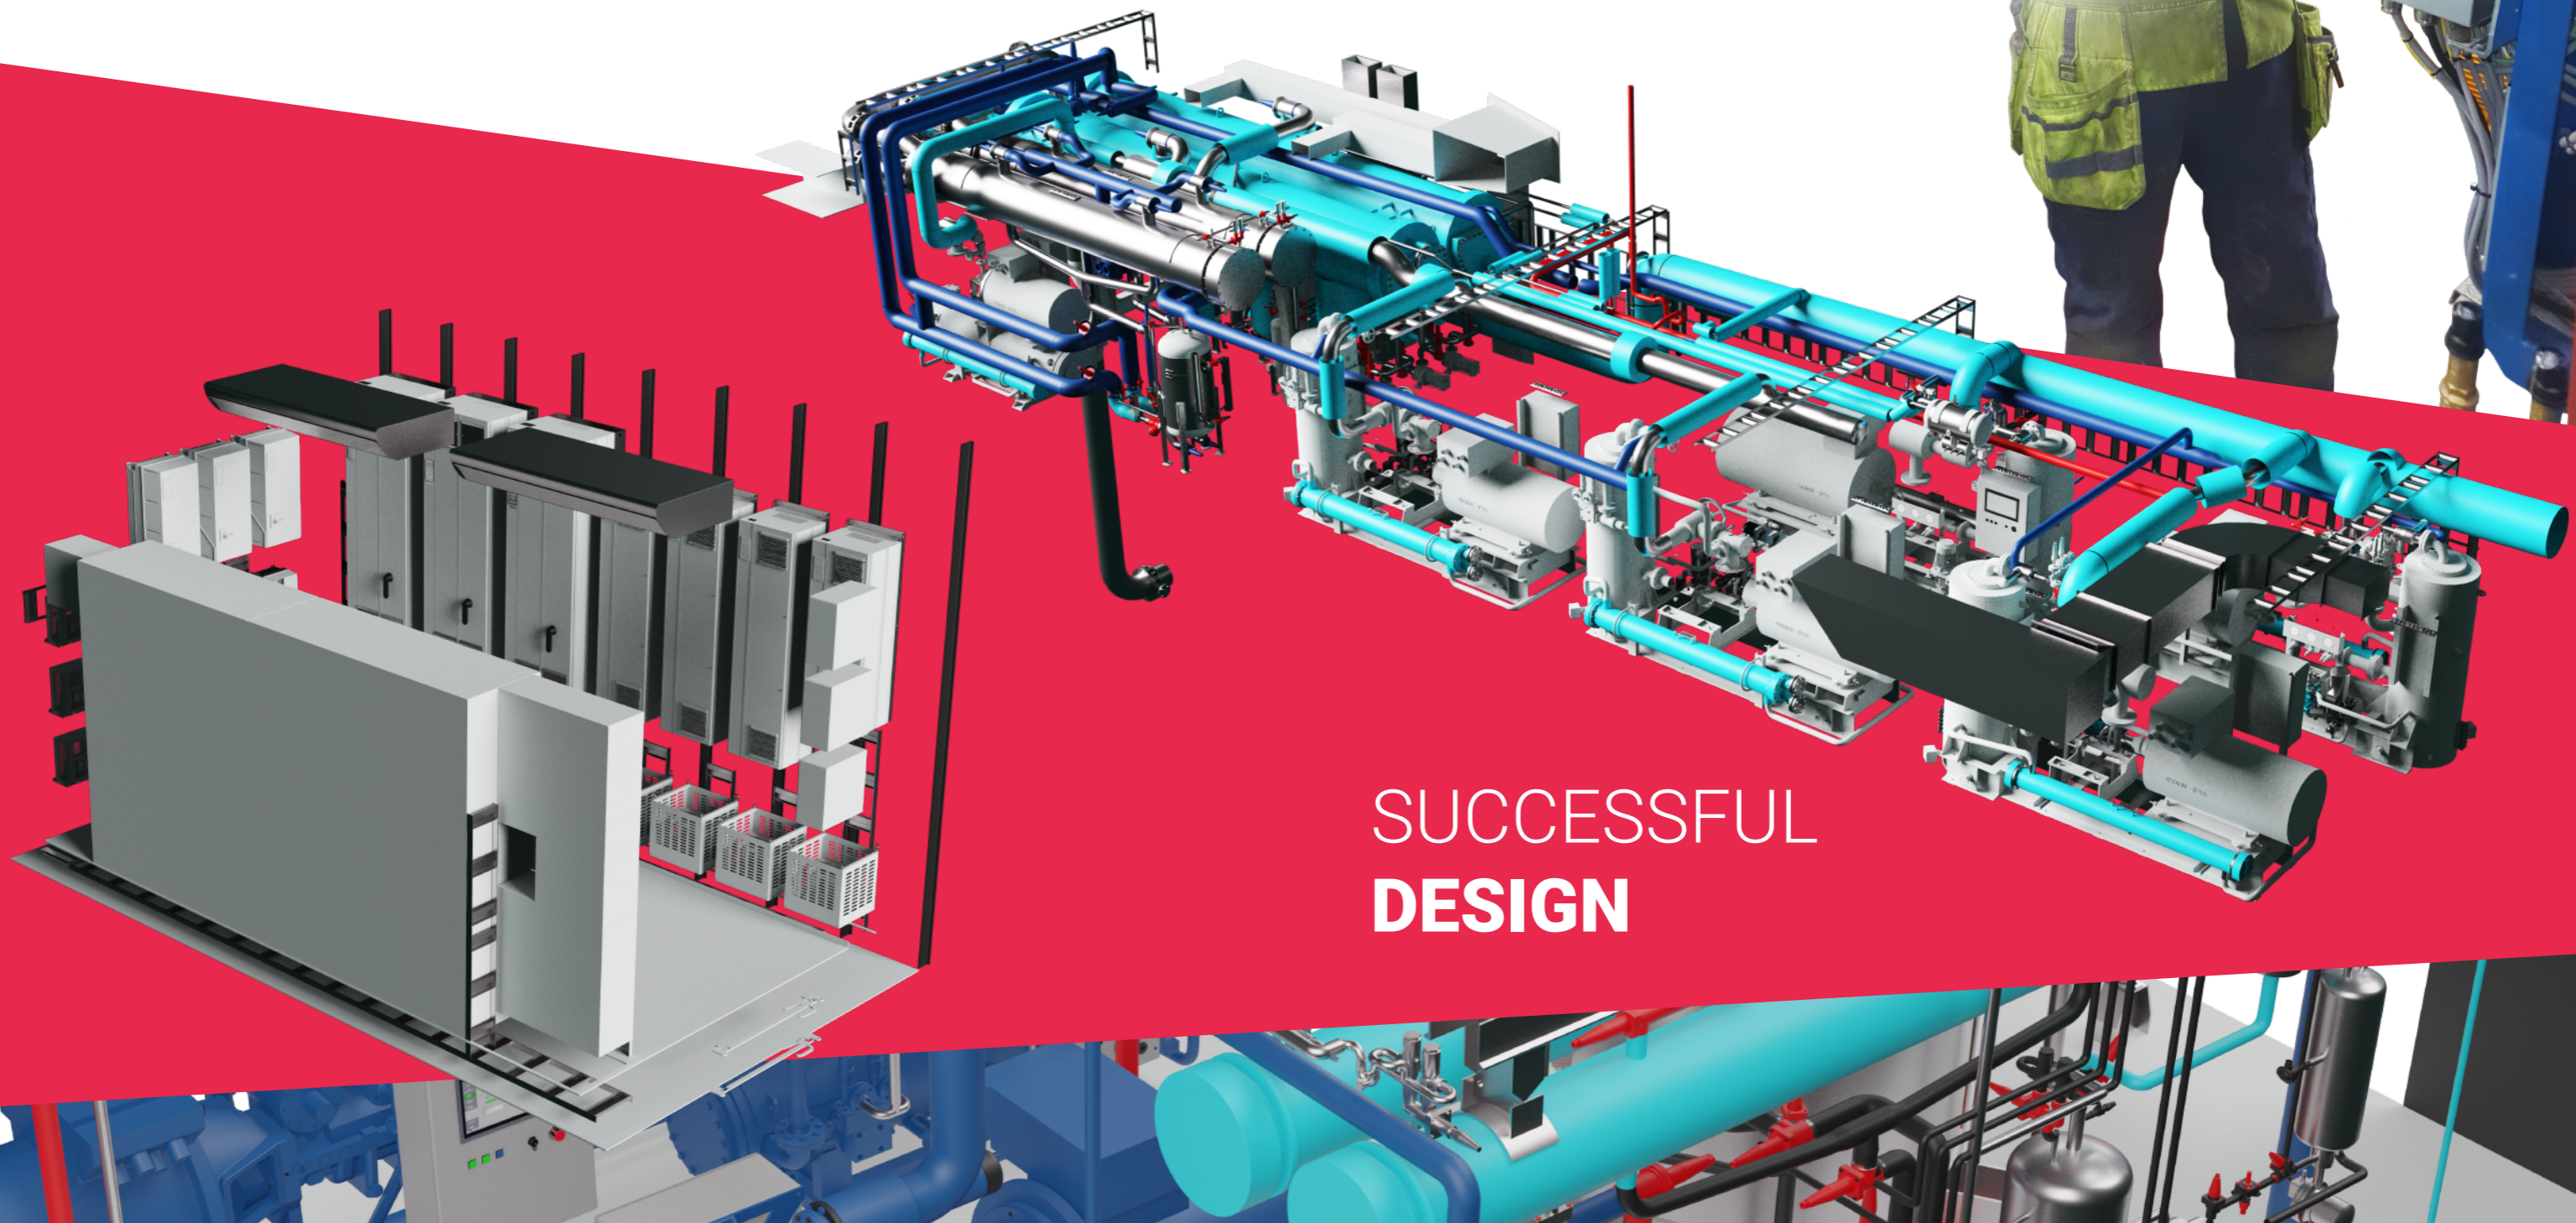

When it comes to cooling or freezing fish on board processing vessels, Frost has decades of extensive experience.

No matter where the project is in the world, we have the solution for you. Our thorough analysis of your needs will help to ensure that we deliver the correct solution for you, meeting all your performance and reliability requirements.

ONBOARD SOLUTIONS

**GREATER PERFORMANCE -
SAVE COSTS**

Are you looking to upgrade your existing system from R22 to ammonia? We have performed a large number of such installations, both in Iceland and abroad.

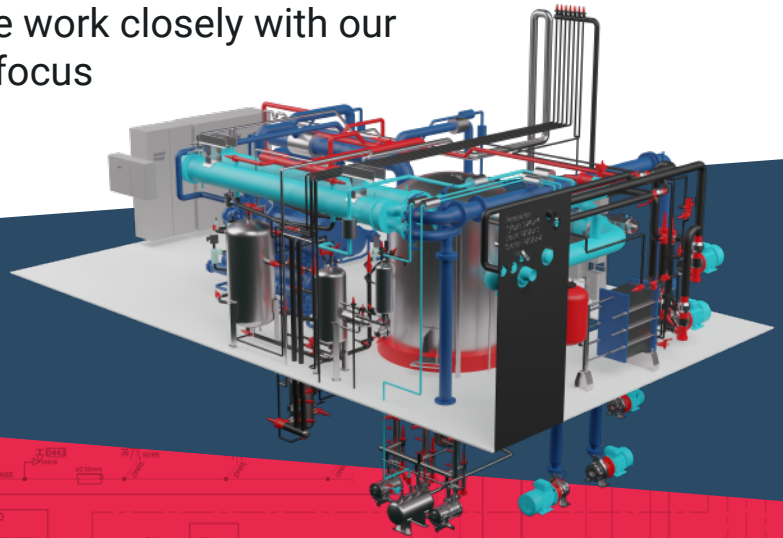

SUCCESSFUL
DESIGN

Frost is a **pioneer manufacturer and provider of services for freezing and refrigeration solutions**, both commercial and industrial. With a wide range of products for the global market, Frost aims to increase efficiency while **maximizing quality and yield**.

Collaborating with major providers and manufacturers allows Frost **more superior and durable product**. We work closely with our customers to solve their needs, with a focus on **safety and energy efficiency**.

REDUCE YOUR CARBON FOOTPRINT

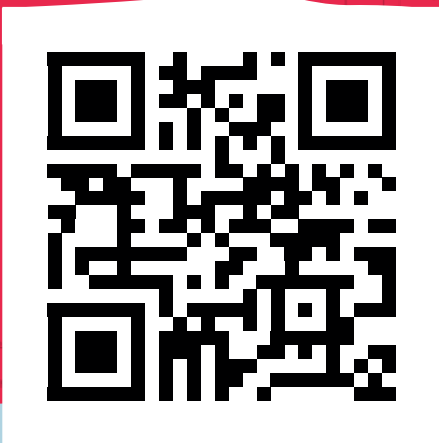

We specialize in removing existing Freon refrigerants from your system and exchanging it with a new and environmentally friendly coolant.
